

WatchGuard® SSL 100 and SSL 560

For anywhere, anytime secure remote access

What a WatchGuard® SSL appliance provides for your business:

INCREASED PRODUCTIVITY

- Remote employees have easy access to essential corporate resources including email, web conferencing, and CRM from any web-enabled device.
- Optional non-native applications, including SSH and RDP, can be delivered through a remote user's web browser for maximum productivity.
- Time-to-value is determined in minutes. Basic configuration enables end users to simply double-click an icon and authenticate, and the access client automatically loads, establishing an SSL tunnel for complete access to the backend network.
- Bi-directional tunneling allows your helpdesk to connect to a remote employee's device to troubleshoot technical problems or update software.

EASE OF USE

- An all-in-one appliance with configuration wizards and auto-populated default settings. Just plug and play – with no other software components to buy, install, or manage.
- Users log on once and have access to everything in the portal – no need for them to waste time repeatedly re-authenticating themselves.
- You can have the appliance up and running quickly. Configure it & forget it, with no thick client to manage.
- Consolidated auditing collects all information about access, identity, and system events in a central repository for quick insight into user and system-based activities.

GREATER SECURITY

- Comprehensive endpoint integrity checking ensures network protection by allowing organizations to configure and enforce endpoint compliance including checks for anti-virus, anti-spyware, firewall software, and many other device attributes.
- Session clean up removes all traces of access from the endpoint – including file deletion and cache cleaning – to prevent data leakage through another user's covert re-entry to network resources.
- Local and third party authentication support, including strong authentication, ensures only authorized users can access the network, keeping intruders out.

FLEXIBILITY

- Client and clientless access – including 32-bit and 64-bit XP, Vista, and Windows 7 support.
- Can be used for the simplest deployment, or IT administrators can take it to the next level by taking advantage of endpoint integrity checking, optional Java-based application delivery, bi-directional tunneling, and more.
- Uniquely capable of supporting any class of application. Administrator can choose to publish only web applications, create tunnels to network or specific resources, as well as deliver optional applications to the desktop for more sophisticated use.
- IT administrators can integrate solution with existing third-party authentication solution, such as Microsoft Active Directory, or rely on onboard LDAP server to configure local authentication, as well as use built-in two-factor authentication including SMS-based tokens and web keypad for identity validation.
- Information in audit logs can be shown in multiple graphical formats for current & historical reporting, and exported to third-party utilities, such as Excel or Crystal Reports, for further data mining and asset management.

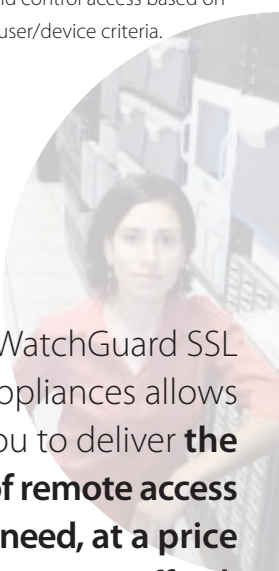

Recommended for businesses with up to 500+ concurrent remote users

The WatchGuard® SSL 100 and SSL 560 are affordable, easy-to-use secure remote access appliances that provide reliable connectivity to corporate data and resources for anywhere, anytime productivity.

The beauty of these products is their flexibility. The SSL appliance allows a business to make its secure remote connectivity deployment as simple or as sophisticated as its business requirements dictate, and at a very attractive price.

For businesses looking for extreme ease of use, this means remote access to standard network resources can be maintained with virtually no management overhead. And for end users, remote access is a breeze.

Businesses with more complex needs can choose to use a mix of both tunnel and portal-based resources, provide technical support to a remote user's desktop, and control access based on a granular user/device criteria.

WatchGuard SSL appliances allows you to deliver **the level of remote access you need, at a price you can afford.**

Connections

Concurrent users*	100	500
User pack included	25 (upgradeable to 50 or 100)	250 (upgradeable to 500)

Dimensions and Power

Product Dimensions	1.75" x 16.75" x 14.25" (4.5 x 42.6 x 36.2 cm)	1.75" x 17" x 11.25" (4.4 x 43.2 x 28.6 cm)
Shipping Dimensions	7.25" x 21.75" x 19.0" (18.4 x 54.6 x 48.3 cm)	5.25" x 21" x 18" (13.3 x 53.3 x 45.7 cm)
Shipping Weight	13.7 lbs (6.21 Kg)	16.1 lbs (7.3 Kg)
AC Power	100-240 VAC Autosensing	100-240 VAC Autosensing
Power Consumption	U.S. 60 Watts (860 Cal/min or 205 BTU/hr)	U.S. 50 Watts (max), 171 BTU (max)
Rack Mountable	1U rack mount kit included	1U rack mount kit included

Access Methods

Browser-based
Auto-downloading thin client
WatchGuard Access Client (Windows only)

Granular Access Rules

Authentication method

Access can be granted by:

Users group membership
IP address of incoming client
Client device
Date, day, and/or time
Assessment
Abolishment
Device
Custom defined

Authentication Support

Onboard LDAP
Onboard Two-factor (SMS token, challenge/response, synchronized, web keypad, OTP)
Onboard RADIUS
Third-party Integration (Active Directory, Novell eDirectory Service, RADIUS, PKI/Certificate support, SA SecurID 2FA, Vasco 2FA)

Application Support

Web-based
Client/server
Tunnel-based
Terminal servers
File servers
Bi-directional (VoIP, online collaboration tools)

*IT administrators typically calculate 1 remote user for every 5 users in the organization; therefore, the SSL 100 is tuned for organizations with 1 to 500 users and the SSL 560 is tuned for organizations with 1 to 2,500 users.

Expert Guidance and Support

LiveSecurity® Service from WatchGuard is the most comprehensive support and maintenance offering in the industry, putting a global team of security experts behind you to make the complex job of IT security management easier. LiveSecurity provides:

- Hardware warranty with advance hardware replacement
- Software updates
- Technical support with a targeted four-hour response time
- Up-to-the-minute security alerts with links to patches to save time

One-year, two-year, and three-year LiveSecurity subscriptions are available, including subscriptions to LiveSecurity® Plus for 24/7 technical support. A premium Gold service is also available for customers with mission-critical Internet requirements who require a one-hour response time.

For more information on WatchGuard SSL appliances, contact your authorized WatchGuard reseller, visit www.watchguard.com, or contact WatchGuard directly at 1.800.734.9905 (U.S.) or +1.206.613.0895.
